## WORKING EXPERIENCE

### Hondabo Enterprises

Colorado Springs, Colorado  
August 2016 - August 2019

#### Refrigeration Mechanic

- Observed and tested system operation, using gauges and instruments.
- Tested lines, components, and connections for leaks.
- Adjusted or replaced worn or defective mechanisms and parts, and reassemble repaired systems.
- Performed mechanical overhauls and refrigerant reclaiming.
- Installed expansion and controlled valves, using acetylene torches and wrenches.

### Yamapro

Colorado Springs, Colorado  
August 2014 - August 2016

#### Refrigeration Mechanic

- Mounted compressor, condenser, and other components in specified locations on frames, using hand tools and acetylene welding equipment.
- Supervised and instructed assistants.
- Cut, bent, threaded, and connected pipe to functional components and water, power, or refrigeration system.
- Read blueprints to determine location, size, capacity, and type of components needed to build refrigeration system.
- Fabricated and assembled structural and functional components of refrigeration system, using hand tools, power tools, and welding equipment.

### Brinfor

Colorado Springs, Colorado  
August 2013 - August 2014

#### Refrigeration Mechanic

- Adjusted valves according to specifications and charged system with proper type of refrigerant by pumping the specified gas or fluid into the system.
- Dismantled malfunctioning systems and tested components, using electrical, mechanical, and pneumatic testing equipment.
- Brazed or soldered parts to repair defective joints and leaks.
- Kept records of repairs and replacements made and causes of malfunctions.
- Installed wiring to connect components to an electric power source.

## EDUCATIONAL QUALIFICATION

### Post-Secondary Certificate Refrigeration Mechanical Technology

Education of Refrigeration Mechanical Technology  
Yeshiva High School  
Colorado Springs, Colorado  
February 2011 - February 2013

## SKILLS

- Determining causes of operating errors and deciding what to do about it.
- Repairing machines or systems using the needed tools.
- Performing routine maintenance on equipment and determining when and what kind of maintenance is needed.
- Installing equipment, machines, wiring, or programs to meet specifications.
- Controlling operations of equipment or systems.

## QUALIFICATIONS

- Knowledge of machines and tools, including their designs, uses, repair, and maintenance.
- The ability to listen to and understand information and ideas presented through spoken words and sentences.

- The ability to communicate information and ideas in speaking so others will understand.
- The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- The ability to concentrate on a task over a period of time without being distracted.
